# Front End

Framework	 React 19 + TypeScript
Build Tool	 Vite 6
Styling	 Tailwind CSS 4
State Management	 TanStack Query, Jotai
Routing	 TanStack Router
Animation	 Framer Motion
Web3 Integration	 RainbowKit + wagmi v2
Charting	 Recharts
Data Grid	 AG Grid
Deployment	 Cloudflare Pages

 OrbitGO

Multichain Treasury Dashboard

License MIT Made by Calpa Liu

A permissionless, plug-and-play multichain treasury dashboard for Web3 treasury managers.

Real-time visualizations · Yield tracking · Cross-chain insights

[Getting Started](#) · [Features](#) · [Documentation](#) · [Contributing](#)

 Key Features

 Real-time Portfolio Tracking

- Multi-Chain Support:** Track tokens across Ethereum, Arbitrum, Base, Kaia, Optimism, and Polygon
- Token Terminal:** Comprehensive token viewing interface with smart filtering and beautiful UI
- Webhook Management:** Create and manage webhooks for token tracking with real-time status monitoring

 Advanced Analytics

- Chain Distribution:** Visual breakdown of assets across different blockchains
- Protocol Allocation:** Interactive charts showing protocol-level distribution
- Yield Tracking:** Monitor APR and performance across protocols

 Smart Features

- Permissionless Access:** No registration required, just connect your wallet
- Data Export:** Export transaction history and portfolio data to CSV
- Real-time Updates:** Automatic data refresh with manual refresh option

## OrbitGO Backend

TS TYPESCRIPT CLOUDFLARE WORKERS

A powerful Cloudflare Workers service that aggregates portfolio data across multiple chains using the 1inch Portfolio API. Built with TypeScript, Hono, and Cloudflare Workers for optimal performance and reliability.

### Features

#### Token Management

- Query token balances for any account across supported protocols
- Support for pagination and filtering by contract addresses
- Full integration with NODIT Token API
- Multi-chain portfolio aggregation
- Queue-based processing to handle rate limits
- KV storage for caching responses
- Structured logging with pino-pretty
- TypeScript for type safety
